

Project Name: PetConnect

Problem Identification

- Pet owners in Salzburg currently rely on fragmented tools (WhatsApp groups, paper logs) to manage pet care.

Problems:

- Missed vaccinations or appointments
- Lack of a Centralized Care Hub
- Difficulty tracking pet activity and health

Target Group

- **Pet Owners:** Busy professionals and students in Salzburg (PLZ 5020/5030).
- **Service Providers:** Independent dog walkers, pet sitters, and local grooming salons.

Functional Requirements (Features)

- **User Management:** Secure login for Owners and Professionals.
- **The Digital Passport:** A database-driven profile for every pet.
- **The Health Dashboard:** Visualizing weight and activity data.
- **Booking & Scheduling:** Book and schedule appointments for services.
- **Messaging / Communication:** Direct messaging with service providers for communication.

Technical Implementation

- **Frontend:** ReactJs
- **Backend:** nestJs
- **Database:** postgresSQL

Task distribution

- **Data Lead:** – Yeabsira Tekuamwork Bizuneh
- **Programming Lead:** – Abirha kahsay Berhe
- **UI/Viz Lead:** – Sadii Makavita Gamage
